

Re: Net Neutrality & an Open Internet

May 24, 2017

Dear Sir or Madam,

Keep the Internet open; keep Obama era rules in place that protect us, the people, who USE the Internet. Restrictions and data profiteering put people's personal information at risk and will harm economic development and innovation.

The FCC exists to serve the people, not corporate interests bent on selling our data for profits.

Just a gentle reminder that you work for us, and that history will remember you.

Thank you,

-Martha
